

DISCOVERY PROGRAM OPTIONS

SCIENCE ACTIVITIES

AQUATIC EXPLORATIONS

Collection, observation, and analysis of pond inhabitants. Key Concepts: adaptation, cycles, food chain/web, succession.

ARCHAEOLOGY

Students acquire hands-on experience at a dig site where they learn the terminology, tools, and techniques used by archaeologists to uncover our shared human history.

BOTANY

Identification and examination of tree structure, function, and classification.

CONSERVATION ECOLOGY

Students explore human impact on the environment. Suggested Topics: erosion control, sustainable agriculture, natural resource consumption, solid waste management, etc.

ORGANIC GARDENING

Plant, weed, compost, learn non-chemical ways to grow flowers and vegetables.

ENTOMOLOGY

Collection, classification, identification, and analysis of insects. Activities related to the study of characteristics of insects, metamorphosis, and the important role insects play in the environment.

FOREST EXPLORATIONS

Exploratory, experimental, dramatic, and sensory activities in a piney wood/ hardwood forest. Key concepts: habitat, community, niche, interdependency, cycles, adaptation.

HERPETOLOGY

View and handle several species of reptiles and amphibians. Familiarize students with reptiles and amphibians in general, their place in the environment, and the differences between venomous and non-venomous species.

MAMMOLOGY

Students explore the characteristics of mammals, and participate in activities that teach them about the range of adaptations that mammals have developed for their different lifestyles.

ORNITHOLOGY

Students participate in activities that teach them about bird behavior and adaptations, and even see our live birds of prey up close.

WATER QUALITY

Survey a water source (creek or lake) using the senses and laboratory experiments and draw conclusions concerning plant and wildlife sustainability.

SOCIAL STUDIES ACTIVITIES

NATIVE AMERICAN STUDIES

An overview of the prehistory of Texas, archaeological principals, and Native American ceremonies. Class topics and activities range from storytelling to our native American games and activities.

THE TEXAS LIVING HISTORY EXPERIENCE

An outdoor dramatization representing life in the Texas Territory during the Revolutionary Period (1835-1836). Students participate with the staff to perform this production, taking the role of historic Texan figures. NOTE: One adult chaperone must be provided per small group of students for supervision and guidance on the trail.

ADVENTURE-RELATED ACTIVITIES (GROUP DEVELOPMENT)

This block works to enhance the student's understanding and respect for one another. The Discovery class groups are presented with tasks that they must cooperatively solve and accomplish.

ARCHERY

Students will learn the basics of a bow and arrow via the National Archery in the Schools Program (NASP). Trained instructors will assist students' in learning the steps to archery success and giving them ample time progress to a bullseye!

CANOEING

An adventurous opportunity to develop cooperative skills.

INITIATIVES

Students participate in group-oriented problem-solving activities. Emphasis on cooperation and communication skills.

CHALLENGE COURSE

Series of activities on the low challenge course which builds trust in one another and a feeling of teamwork in accomplishing a task. Emphasis on trust, teamwork, problem-solving, and encouragement. A trained instructor facilitates the experience, including safety instructions and follow-up discussions that will help the group transfer their experience to their everyday lives.

HORSEBACK RIDES

Take a 1 hour trail ride through our scenic piney woods, followed by some time in our petting zoo to visit our pigs, goats and donkeys. Beginner riders welcome! An additional \$15/rider fee will be charged, subject to availability.

ORIENTEERING

Practice in the use of a map and compass, including an experience following a compass course.

OUTDOOR LIVING SKILLS

Learn how to build a shelter and survive in the wilderness. This session promotes group cohesion and relational development.

NIGHT ACTIVITIES

CAMPFIRE

Relax, laugh, perform, and socialize by fire light. Our staff tells stories, leads skits and songs which involve the students. Students perform skits or songs in their small groups.

NIGHT HIKE

A sensory hike in the dark that provides students with the opportunity to explore and become comfortable with the night time world in safety.

ASTRONOMY

Presentation of information related to the stars and the universe through storytelling and observation. If skies do not allow for telescope viewing, alternate indoor options are available.

CITIES

A night-time, fun game played in an open field. The game helps students become comfortable with traveling without flashlights in the dark and introduces nocturnal animal behavior.

Many three-hour blocks may be a combination of two classes: for example, aquatics and entomology. Night blocks could include a hike and a campfire.
